# Skytron 6700B Hercules Operating Table – Refurbished

*Stock Photo – Options May Vary*

**FULLY REFURBISHED · CLINICALLY CERTIFIED**

Skytron 6700B Hercules Operating Table – Refurbished. The Skytron 6700B Hercules is a powerful and reliable solution for surgical environments. With a 1,200 lb.

weight capacity in the normal position, it supports a wide range of procedures while ensuring patient safety and stability. Designed for efficiency, it features a 23″ low height adjustment and 210º tabletop rotation, thus facilitating easy patient access and full-body imaging without repositioning. Consequently, this improves workflow and supports advanced imaging techniques like C-arm use.

For added safety, the table includes a Self-Leveling Brake System to prevent movement during surgery. Moreover, North American side rails make it compatible with most accessories, offering flexibility and cost savings for any OR setup.
