Skytron 3600B UltraSlide Surgical Table – Refurbished

Stock Photo – Options May Vary

FULLY REFURBISHED · CLINICALLY CERTIFIED

Skytron 3600B UltraSlide Surgical Table – Refurbished. The Skytron 3600B combines strength, precision, and versatility for today's surgical environments. With a 1,000 lb lift capacity and 800 lb articulated weight limit, the Skytron 3600B supports a wide range of patients safely and effectively.

Additionally, the Skytron 3600B features a wired hand control, 23″ top slide, and C-arm compatibility, allowing easy imaging access without repositioning. Furthermore, the Skytron 3600B features hydro-electric brakes and a return-to-level function, improving workflow and table control during procedures. Moreover, the Skytron 3600B includes accessory side rails that fit most surgical tools and a removable headrest.

It also features a powered kidney bridge for specialized positioning.
