The Steris Amsco Century V120 sterilizer offered by Venture Medical is a Prevac unit, which is designed for fast, efficient sterilization of surgical instruments and related items. This sterilizer boasts a large 20"x20" chamber size with a depth of 38". The unit is user friendly and has enhanced ease of use with its intuitive touch screen interface screen. The vertical sliding door, which is activated by a foot pedal, makes loading and unloading the unit much easier than with older models that utilized a traditional swinging door.

All refurbished units from Venture Medical come standard with a new 30kW steam generator, unless house steam is available. The Steris Amsco V120 can come in freestanding or recessed mounting configurations and comes with one loading rack and two shelves.

The Steris Amsco V120 sterilizer comes fully refurbished with a comprehensive warranty.
