

Stryker Rugged Ambulance Stretcher - Refurbished

The Stryker Rugged Ambulance Stretcher is a perfect choice for emergency transportation. The lightweight, yet durable construction makes the stretcher easy to handle and navigate. The one handed operation of the backrest and side rails simplifies use. The basic model has a 500lbs weight capacity, but other models in the series can handle up to 650 lbs.

The break-away head section helps in tight areas, reducing the stretcher length by to 62", making the Stryker Rugged is one of the most maneuverable stretchers on the market today.

The Stryker Rugged comes completely refurbished with a comprehensive warranty and a new pad.

- Transport at load height capability
