- 4 Pre-Set Sterilization Programs
- Overheat Protection
- Automatic Shutoff
- Drying Cycle
- Includes Trays
- Front Facing Drain Valve
- Completely Refurbished
- Comprehensive Warranty

The Tuttnauer 3870E is one of the largest volume automatic tabletop autoclaves in the industry. The 3870E features a 15" diameter chamber and is both reliable and economical. It is the perfect choice for larger sterilization needs without upgrading to a hospital-grade unit.

The Tuttnauer 3870E features a fast cycle time for its capacity of only 23 minutes from a hot start (standard, unwrapped) and offers an efficient drying cycle for wrapped instruments. The unit is also equipped with 2 trays.

The unit has easy to use controls and pre-set programs for sterilization that make using the sterilizer as simple as pushing a button. The 3870E also had a double safety locking device that prevents accidental openings of the door when pressurized. The drain valve is conveniently located on the front of the unit for easy draining.

The Tuttnauer 3870E comes completely refurbished with a comprehensive warranty and includes trays.
