

Tuttnauer 3870M Autoclave - Refurbished

The Tuttnauer 3870M is one of the largest volume tabletop autoclaves in the industry. The 3870M features a 15" diameter chamber and is both reliable and economical. It is the perfect choice for larger sterilization needs without upgrading to a hospital-grade unit.

The Tuttnauer 3870M features a fast cycle time for its capacity of only 23 minutes from a hot start (standard, unwrapped) and offers an efficient drying cycle for wrapped instruments. The unit is also equipped with 2 trays.

The unit has an auto shut-off at the end of both the sterilization and drying cycles, and a double safety locking device prevents accidental openings of the door when pressurized. The drain valve is conveniently located on the front of the unit for easy draining.

The Tuttnauer 3870M comes completely refurbished with a comprehensive warranty and includes trays.

- Manual Autoclave
- Large Capacity Chamber (22 gal)
- Deep 30" Chamber
- 15" Diameter Chamber
- Economical
- Overheat Protection
- Automatic Shutoff
