- Stainless Steel Base and Column
- North American Side Rails
- Swivel Casters
- Includes New 3 Piece Pad

The Skytron 6700B Hercules operating table is a modern multi-purpose surgical table and a great choice for almost any surgical setting. The Skytron 6700B features include wired hand control, 210° tabletop rotation, hydro-electric brakes, C-Arm compatibility, and 1200 lbs. weight capacity (lift) in normal position. Even when articulated, the weight capacity is still an impressive 1000 lbs.

The 6700B also has a low height of 23", making transfers safer and easier. The leg and back section are removeable, which makes anesthesia access easier for shorter patients in lithotomy position, and also more legroom for seated surgeons. Removeable leg section also creates more free space for cysto and urology procedures.

The Skytron 6700B has all standard functions ± back, ± leg, ± height, ± tilt, ± flex, trend/rev trend, and return-to-level. The 6700B is also equipped with battery operation.

This Skytron 6700B Hercules surgical table comes completely refurbished with a comprehensive warranty and new pad set.
